

**NCCMP Supports the Growing Retirement Options for Workers (GROW) Act; Urges Swift Passage
Statement by Michael Scott, Executive Director, NCCMP**

“The bipartisan GROW Act strengthens and modernizes the multiemployer pension system for the future at a time when the stakes could not be higher. Despite supporting 13.6 million American jobs in 2015, and contributing \$158 billion in federal taxes and more than \$1 trillion to U.S. GDP, today the system faces uncertainty and instability. The GROW Act will help safeguard this economic engine by better protecting workers’ retirement security, and providing greater certainty and stability to employers in the multiemployer system. The NCCMP applauds Reps. Roe and Norcross for their leadership in introducing this legislation, and we call on Congress to protect the future of millions of American workers by swiftly passing the GROW Act without delay.”
